"ASTRA" 4" CHECK VALVE MODEL CV RATED - 175 P.S.I. WORKING PRESSURE

DESCRIPTION AND OPERATION

The "Astra" 4" Check Valve incorporates solid bronze, rubber faced swing clappers with the labor saving wafer design. With lightweight, high density cast iron bodies, these valves will not crack or break when dropped. Listed by Underwriters' Laboratories and approved by factory Mutual.

The "Astra" 4" Check Valve is intented for installation in the water piping of fire protection equipment where the working pressures do not exceed 175 PSI. They are gravity operating and may be installed in either horizontal or vertical positions.

The Wafer Check Valve is installed with 2 rubber flange gaskets between 2 standard pipe flanges, held together with 8 bolts.

Included in the optional "Astra" Wafer Check trim package are a 1/2" ball drip and street albow for installation in fire department connection piping. This should be installed in the tap at the bottom of the check valve inlet.
